Current Placement	Emergency Shelter
Reason for Removal/Involvement	Parental Methamphetamine Abuse
Removal Date	1/12/2024

Presenting Problem

Evakay (Eva) is a 14-year old female and described as artistic, smart, and intelligent. She and her sister, Alexis (9 years old) were placed at Kids Kottage on January 23, 2024. Eva and Alexis had been placed with their paternal grandmother on January 12, 2024. Although Eva and Alexis are both at Kids Kottage they program and sleep in separate buildings due to their ages. Eva does not exhibit any behavioral concerns. Upon arrival at Kids Kottage Eva and Alexis were being treated for having lice. A resource family was identified for both siblings and transition was scheduled for January 30, 2024.

This assessment was requested to determine what services could be beneficial to Eva and other treatment recommendations, if any.

Background Information

Washoe County Human Services Agency (WCHSA) received a report on January 12, 2024, with the allegation of physical risk by Donovan (step-father to Eva and biological father to Alexis) and Megan (mom) to Eva (14) Alexis (9). Additionally, there was an allegation of substance use by Donovan. Per the report, it was believed Donovan had moved out of the home after an investigation was completed by WCHSA on November 2, 2023, due to allegations that Alexis had found methamphetamine in the home, Donovan was actively using methamphetamines, and fighting between her parents. However, it was discovered that Donovan was still living in the home. This resulted in Eva and Alexis being placed with their paternal grandmother, Della. On January 23, 2024, Eva and Alexis were placed at Kids Kottage.

Eva had insight as to reasons for removal and stated her step-father started treatment and this showed he was doing what he needed to in order for her and her sister to return home. She discussed how they, as a family, could do some things differently when she and her sister returned home to help each other out. For example, she stated they could all pick up after themselves more so it didn't fall on one person.

Problematic Symptoms

Sleep - Difficulty Falling Asleep

Problematic Symptom Description

Eva reports not sleeping as well due to her new surroundings, being away from her family, and the hard beds at Kids Kottage.

Current Functioning

Current Functioning Description

Eva does not endorse any symptoms.

Probation / Parole Officer Name Probation / Parole Officer Phone

Strengths, Resources, Limitations

Personal, cultural, religious, spiritual beliefs / practices No

What limitations or barriers does the family have?

Although Megan and Donovan have remained engaged in accessing services, it is reported Megan has not actively engaged in consistent communication with her case worker.

What strengths or resources does the family have?

Megan reports she is Jewish and Donovan has no religious beliefs. Megan expresses no concern with Eva exploring different religions. They do not push any religious beliefs on their children.

Eva discussed several fond memories she and her family have built through the various activities they do as a family. Eva presents as very thoughtful in her decision making and demonstrates insight into her current situation and is able to identify some potential positive outcomes. Eva is aware Donovan has entered treatment and expressed this demonstrates his taking responsibility and taking steps needed so she and her sister can return home. She also stated that one thing they can do as a family is help each other out more by "picking up" after themselves. She is aware that her mother has not had consistent contact with their case worker and when this clinician expressed how it could be understandable that it might be hard to hear some of your parenting practices are being judged, Eva stated that it can be good to hear what you might be doing wrong to make you aware and give you the chance to learn and change.

Donovan has admitted to using substances since he was 12 years old and expressed the desire for treatment. On January 24, 2024, Donovan began treatment at the VA and is attending a partial inpatient program. Donovan and Megan plan to begin couples counseling at the VA.

Who can the child count on for support? Parents, Sibling(s), Friends

Strengths, Resources, and Supports Detail

Recommendations

Assessment, Treatment, and Service Recommendations

A. No recommendations

Assessment, Treatment, and Service Recommendation Details

CASII Score: 14, this score is elevated due to the recent removal, Donovan's very recent access of treatment, and Megan's inconsistent contact with WCHSA.

Family foster care is appropriate. Eva and Alexis had started visiting a resource family and she was excited of being able to transition from Kids Kottage to their home. Eva is an important support to her sister, Alexis, and has been observed to comfort her during their adjustment of being removed and placed at Kids Kottage and supportive of her in meeting and visiting with their identified resource family. It should be noted that future placements with Alexis and Eva must remain together as they have a strong, supportive bond and separating them would cause undo harm.

Presenting Problem

Alexis is a 9-year-old girl who is described as happy and funny. She and her sister, Evakay (Eva, 14 years old) were placed at Kids Kottage on January 23, 2024. Alexis and Eva had been placed with their paternal grandmother on January 12, 2024. Although Alexis and Eva are both at Kids Kottage they program and sleep in separate buildings due to their ages. Alexis expressed missing her sister as they did sleep in the same room the night they arrived at Kids Kottage. Alexis does not exhibit any behavioral concerns. Upon arrival at Kids Kottage Alexis and Eva were being treated for having lice. A foster home placement was identified for both siblings and transition was scheduled for January 30, 2024.

This assessment was requested to determine what services could be beneficial to Alexis and other treatment recommendations, if any.

Background Information

Washoe County Human Services Agency (WCHSA) received a report on January 12, 2024, with the allegation of physical risk by Donovan (biological father to Alexis and step-father to Eva) and Megan (mom) to Alexis (9) and Eva (14). Additionally, there was an allegation of substance use by Donovan. Per the report, it was believed Donovan had moved out of the home after an investigation was completed by WCHSA on November 2, 2023, due to allegations that Alexis had found methamphetamine in the home, Donovan was actively using methamphetamines, and fighting between her parents. However, it was discovered that Donovan was still living in the home. This resulted in Alexis and Eva being placed with their paternal grandmother, Della. On January 23, 2024, Alexis and Eva were placed at Kids Kottage. Alexis's perception of being placed at Kids Kottage was due to "grandma didn't want to be the boss of us anymore". Alexis had a virtual visit with her parents prior to the psychosocial assessment and shared her visit went well. Since the removal Alexis has reported trouble sleeping and adjusting to the beds at Kids Kottage. Alexis had severe lice that is still under a 21 day treatment.

Problematic Symptoms

Sleep - Difficulty Falling Asleep

Problematic Symptom Description

Alexis reports she has experienced difficulty falling asleep since being placed at Kids Kottage and attributes this mainly to the "hard beds". She indicated she might not fall asleep until the sun comes up. Kids Kottage staff have not observed this level of difficulty with Alexis falling asleep and report she goes to bed at 8pm and stays asleep during the night.

Current Functioning

Current Functioning Description

Alexis does not endorse any symptoms.

Describe the child's attitude towards school / education

Alexis reported her favorite subject is Science because she gets to do experiments and is able to successfully complete experiments on her own. Alexis does not enjoy math "because it can be hard sometimes". Alexis reported having a best friend at school and a positive social group. Alexis presents as making friends easily as she made friends at the Kids Kottage during the first couple days of being placed.

How does the child perceive they are doing at school?

Alexis reports she does well in school and does not have conflicts with teachers or peers.

Medical History**Pediatrician's Name****Facility****Pediatrician's Phone Number****Describe the Child's Overall Health**

Megan reports Alexis is established with UNR Family Medicine. Alexis reported she was allergic to cat dander, bees, wasps, and pollen. She also reported she has a Epipen and takes over the county allergy medication(Equate Allergy Relief). She stated she does not have her Epipen with her at Kids Kottage. This was discussed with Megan and she reported she would bring an Epipen during the next family visit on February 2, 2024. It is important to ensure there is an Epipen for Alexis at future placements.

What limitations or barriers does the family have?

Although Megan and Donovan have remained engaged in accessing services, it is reported Megan has not actively engaged in consistent communication with her case worker.

What strengths or resources does the family have?

Alexis breaks out into a smile when talking about family time (movie nights and video game nights) and making ribs with her father. She discussed her routine at home with having two chores assigned to her and her sister. Alexis also discussed being rewarded after doing chores. Alexis is aware of her father going to treatment to show he is getting help so she and her sister can return home.

Donovan has admitted to using substances since he was 12 years old and expressed the desire for treatment. On January 24, 2024, Donovan began treatment at the VA and is attending a partial inpatient program . Donovan and Megan plan to begin couples counseling at the VA.

Who can the child count on for support? Parents,Sibling(s),Extended Family,School Staff

Strengths, Resources, and Supports Detail

Alexis strongest relationship appears to be with her sister, Eva, who she enjoys visiting while at Kids Kottage. Alexis is also protective of Eva when it comes to boys trying to talk to her big sister. Alexis speaks positively of her parents, in particular her dad, who she enjoys playing video games with on the weekend.

Recommendations

Assessment, Treatment, and Service Recommendations

A. No recommendations

Assessment, Treatment, and Service Recommendation Details

CASII Score: 14, this is score is elevated due to the recent removal, Donovan's very recent access of treatment, and Megan's inconsistent contact with WCHSA.

Alexis is the 9-year-old daughter of Megan McCafferty and Donovan Clark. She is currently in the 4th grade at Sepulvada Elementary and was placed at Kids Kottage at the time this assessment was conducted. Alexis has been described as a happy and funny girl. Alexis does not have any reported behaviors. Alexis presents as resilient and identifies several friends and supports she has access to, including her school counselor, older sister, and best friend.

Family foster care is appropriate. Alexis and Eva had started visiting a resource family and she was excited of being able to transition from Kids Kottage to their home. Alexis's sister, Eva, has been observed to comfort Alexis during their adjustment of being removed and placed at Kids Kottage and supportive of her in meeting and visiting with their identified resource family. Alexis talks highly of her sister as someone she can go to. It should be noted that future placements with Alexis and Eva must remain together as they have a strong, supportive bond and separating them would cause undo harm.

There are no recommendations for therapeutic follow-up at this time as no emotional or behavioral concerns are identified. If, in the future, Alexis expresses the desire for therapy or emotional or behavioral concerns arise, therapy can and should be revisited.
